**TIPS:**

1. Note that it is http, not https
2. If the browser cannot access, modify their browser access rules or security restrictions, (our test in Safari and Chrome are runnable)
3. all the necessary user name and password I have written in the readme, all the rest of the settings can be used in the site administration panel.
4. sever is David's personal server, please next group get the project as soon as possible to talk about the project deployed to their own cloud/sever, then I will close this side of the sever run. Of course, you can contact David with questions, I will try to answer your questions.
5. next group of students who got our project, GOOD LUCK!

David
